

WITH THE District Agriculturist

By J. S. Duncan

Treat Cattle For Lice
There is probably more loss of livestock due to lice than most people ever imagine. This loss is mostly in loss of weight and poor doing by animals infested. There is no reason to take this loss. Spraying in the fall when cattle come in off pasture is easy and effective. Two sprayings at intervals of ten days to two weeks, using any of the recommended insecticides will give almost complete control. In many parts of the province farmers are forming groups to buy a sprayer for use in house control in the fall and warble control in the spring.

Care of Lawns
One of the reasons why lawns kill out in patches is because of a fungus called Snow Mould. This fungus grows at low temperatures and can do a lot of damage. The use of a 2 to 1 mixture of Calomel and corrosive in the early fall at a rate of sublimite, spread on the lawn about 4 ounces per 1000 square feet helps to prevent this trouble. It may be necessary to mix these chemicals with dry sand in order to get them spread evenly.

Toronto Royal Winter Fair
Don't forget the possibility of taking in this extra special event coming up in November. Group tours will be available again this year. Contact your station ticket agent.

Start Calves Feeding
Cows are going dry now, so in order to keep calves doing well they must get a little extra feed. It is a good idea to fix up a creep where the calves can get some grain. Calves started on feed will not suffer a setback at weaning time.

Home Economist Appointed To Wainwright Office
We are very happy to announce that a District Home Economist, Miss Edna Craig, has been appointed to this office. Miss Craig is now in Wainwright and will be happy to hear from the ladies in the district.

NOTICE

All grain hauling charges will be deducted from grain on delivery to elevators at Irma and Jarrow.

GETTING MARRIED?—If so, be sure and use our complete line of Wedding Invitations at reasonable cost. New samples in the latest designs are now on hand. Enquire at The Viking News Office.

Weekly Inspirational Corner

(Sponsored by an Irma Times reader)

And why call ye me, Lord, Lord, and do not the things which I say?
Whoever cometh to me, and heareth my sayings, and doeth them, I will show you to whom he is like:
He is like a man which built a house, and digged deep, and laid the foundation on a rock: and when the flood arose, the stream beat vehemently upon that house, and could not shake it: for it was founded upon a rock. But he that heareth, and doeth not, is like a man that without a foundation built his house upon the earth: Against which the stream did beat vehemently, and immediately it fell; and the ruin of that house was great.
Luke 6: 46-49

Wedding Bells

LYTLE — ATKINSON

Edson United Church was the scene of a very pretty wedding on September 4 at 2 p.m. when Elizabeth Barbara, youngest daughter of Mr. and Mrs. C. T. Atkinson of Carrot Creek, became the bride of James Sidney Lytle, also of Carrot Creek.

Rev. C. Armstrong performed the ceremony before an altar decorated with mixed flowers. Given in marriage by her father, the bride looked charming in a floor-length gown of white lace and net over white satin. The matching lace bolero had puffed sleeves with lace fingerless gloves. Her floorlength veil of illusion net was held in place by a coronet of white roses and she carried a bouquet of red sweetheart roses and white daisies. Her only jewelry was a necklace and earrings set of gold, set with red ruby, gift of the groom.

Mr. Doreen King, sister of the bride, attended as maid of honor. She was dressed in a floor length gown of yellow nylon sheer with a matching bolero and gloves with matching headpiece of net and roses. She carried a bouquet of pale pink mums and wore a rhinestone necklace and earrings, gift of the bride.

Miss Clara Ann Fuscio, niece of the bride, attended as flower girl. She wore a Nile green floor length gown of nylon net over sheer with matching headpiece of net and daisies. She wore white gloves and carried a nosegay of pink roses and blue forget-me-nots. Her necklace was a gift of the bride.

The groom was supported by George Smith as best man. Ushers were Harry King and Roy Kiehlbough.

For her daughter's wedding, Mrs. Atkinson chose a navy dress with white accessories and a corsage of pink roses.

Mrs. Lytle, mother of the groom, chose a blue dress with rosewood accessories and a corsage of pink roses.

After a trip to the photographers, a wedding party drove to the bride's home at Carrot Creek where a reception for more than fifty friends and relatives was held.

The main table was beautifully set with a lovely three-tiered wedding cake with gladioli on each side. Mr. Hugh Adams, of Fabyan, proposed the toast to the bride, which was responded to by the groom.

Out of town guests were Mr. and Mrs. Ed Singleton of Lethbridge, Mrs. Howard Pigeon of Drayton Valley; Mr. and Mrs. Hugh Adams, Mrs. Hector Benoit and Harvey, Fabyan; Mr. and Mrs. Steve Fuscio and family, Irma; Mr. and Mrs. Harry King and Linda, Edson.

A day followed in the Carrot Creek hall.

For going away the bride changed to a light grey suit with a powder blue shortie and powder blue accessories and a corsage of red roses.

Upon their return they will make their home on the groom's farm at Carrot Creek.

Mrs. Lytle, mother of the groom, chose a blue dress with rosewood accessories and a corsage of pink roses.

Mrs. Art Long is spending the month of September at the home of her daughter, Mrs. Hall at Taber, Alta.

Mr. and Mrs. Sam Bell of Hardisty, visited last Saturday at the E. R. Jackson home.

Glen-Coa Gleanings

Congratulations from our community to the former Miss Pat Pedel who became the bride of Mr. Graham Johnston of Edmonton on Friday of this week. The wedding took place in Edmonton.

The Rev. Gerhard Ostrem, missionary on furlough from Colombia, South America, paid a visit to Sharon on Thursday evening to show pictures and to let of his work. He will be the guest speaker at Sharon on Sunday afternoon at 3 p.m.

Mr. and Mrs. Ralph Erickson drove to Edmonton last Sunday to visit the latter's father, Mr. S. Nilson, in the University hospital.

Mrs. G. Likness and son Ernest of Winkler, Sask., were guests at the O. Likness home on Sunday.

Again, at time of writing, beautiful harvest weather. However, radio weather news is discouraging.

Kinsella News

Recent visitors at the Joe Zelinski home were Mr. Brock Hetherington of Appin, Ont., Mrs. Robert Ash of Viking and Mrs. Bud Erickson and family of Bruce.

Mr. Roland Bick of Cobalt, Idaho, has been visiting at the home of Mr. and Mrs. Wm. Boyd. Mr. and Mrs. R. Mathison and Mr. O. Elgoon, all of Edmonton, were visiting Mr. and Mrs. K. Overbo recently.

Mrs. C. E. Bradow of New Westminster is visiting at the home of her daughter and son-in-law, Mr. and Mrs. B. C. Carpenter.

Mrs. A. Loades is taking a vacation in the States and at the West Coast.

Mr. George Stevens who has been working at Camrose has returned home.

Don't forget the Community League meeting to be held next Monday, October 1, when Mr. Chomik, District Agriculturist, will speak on the Formation of a 4H Club.

Douglas MacGregor spent the week-end at the home of Bobbie Wilkinson.

Mrs. Frank Murray was visiting at the home of Mr. and Mrs. Grant MacGregor last week, and while there visited Mrs. MacGregor's parents, Mr. and Mrs. J. Osback. Mrs. MacGregor Sr. and Mr. and Mrs. J. Horinek, all of Selkirk.

The Elks Club are progressing with the building of the curling rink. A large truck load of lumber arrived on Saturday so they intend to get busy before the snow flies.

The members of the church choir and a number of their friends enjoyed a social evening on Thursday the 20th. A baked bean lunch was served.

Donation to Sunday School in memory of Mrs. M. Millawa from Mr. and Mrs. K. Overbo and Mrs. R. Stevens.

The W.I. will meet on Saturday, September 29.

Echo-Rodino

Mr. and Mrs. Henry Vandervaele and Mr. and Mrs. Harry Vandervaele spent a day at Vermilion.

Mr. and Mrs. John Vandervaele, and family of Chisholm were down for the week-end.

A miscellaneous shower was held at the home of Mrs. Deba Faulkner in honor of Mrs. Sydney Cooper of Buffalo Coulee.

Wm. McFarlane made a trip to the city on Monday, also Henry Vandervaele.

Norman Hollar had the misfortune to fracture his arm.

The September meeting of the W.A. was held at the home of Mrs. Rosie Vandervaele.

Bill Hardy spent Monday with Marvin Crouse, and Sheila Crouse entertained Patsy Ramsey.

Gloria Baras has been visiting with Tannis Beckett.

Home Economist Newsnotes

Hello Homemakers
At last there's a District Home Economist in the Wainwright-Vermilion area.

I would like to tell you a little about myself. I am a native of Manitoba, I graduated from university there in 1955. Last year I worked as a Dietitian in Calgary General Hospital. When I was in 4-H club work, I dreamed of the day when I'd be a Home Economist. So here I am. I am looking forward to meeting each and every one of you.

It has been a long time since the last girl worked in this district. Perhaps some of you have forgotten the services we offer. In case you have I will list them for you.

1. Individual assistance through home visits or office visits.
2. Enquiries for special information by mail or phone.

3. Leaflets and bulletins, and a newsletter on homemaking problems.

4. Organization and supervision of Girls 4H clubs.

5. Demonstrations and lectures.
6. Study courses and clinics in Nutrition, Home Decorating and Sewing.

Would you like to take advantage of our services? If so, write or call me, phone 51 Wainwright or if you are in the Vermilion area, contact Mr. Buckingham's office and he will forward your request.

If your women's group would like a demonstration or talk on a particular topic, I would appreciate suggestions.
Are there 8 or more girls in your community over the age of 12? Would they be interested in 4H club work?

We have 3 winter projects to choose from — Clothing, Food and Home Decorating. Information is available on request. I will give you all the assistance you need to get started.

Do you have a daughter over 16? We still need applicants for the Homemaking Course at the Vermilion School of Agriculture. It is now a one year course and is a wonderful opportunity for fellowship and learning. Information available at my office.

A newsletter will be sent out shortly. If you would like one, please write me.
—Your District Home Economist,
Edna M. Craig

EASTERLY ECHOES

Visiting from New Westminster with the Dootson family for a few days was Mr. and Mrs. Jimmy Carter.

We are sorry to report that Mr. Jimmy Bell is in the Wainwright hospital.

Mr. Archie Cook and Lorne visited at Galahad over the week-end.

The Allen Johnston family of Edmonton were visitors at his sisters, Mrs. Howard Oldham, last Sunday.

Mrs. Grey of Wainwright was visiting with her daughter Mrs. Stuart Fenton for a few days last week.

The Sew and So Club are sponsoring a Variety Show and dance at Passchendale School Nov. 16.

Jarrow News

Mrs. Harry Meakins was the guest of honor when her children, their families and also close friends and neighbors surprised her on Sunday night with a birthday party. She was the recipient of many useful gifts and to end it all a delicious lunch was served.

Mr. and Mrs. Leo Mark were week-end visitors at the home of the latter's parents, Mr. and Mrs. E. Bruhaug. Mr. Mark returned to the city but Olga is spending part of her two week holiday here from her duties at the University hospital.

CHURCH SERVICES

ST. MARY'S CHURCH NOTES

Harvest Thanksgiving Service will be held in St. Mary's church on Sunday, September 30 at 2 p.m.

The Churchwardens and Vestry of St. Mary's would appreciate a special Thanksgiving offering at this service. Our many friends are cordially invited to worship with us.

There will also be a Celebration of Holy Communion in St. Mary's Church on Sunday, Oct. 7 at 2 p.m.

ST. GEORGE'S MISSION

Harvest Thanksgiving Service will be held in the Metropolitan School on Sunday, October 7 at 4 p.m. A cordial invitation is extended to all our friends to worship with us.

UNITED CHURCH

Sunday, September 30

Albert Sunday School and Study Group 10 a.m.

Irma Sunday School 10:30 a.m. Rally Day and Promotion Service

Worship Service 11:30 a.m. John 3:8. The wind bloweth where it listeth, and thou hearest the sound thereof but canst not tell whence it cometh and whither it goeth.

H. W. Inglis, Minister.

Honk! Honk! Har-onk!

On their annual safari into "Gooseland" in the Coronation area, the Sonett brothers, James of Edmonton, Carl of Jarrow, Tony of Rochford Bridge, and Art Knudson returned home with twenty geese which they brought down in a shoot at the first of the week. While they did not get as many as last year, they report that the average weight per bird was higher, due no doubt to some very fine fields of grain there — one field of barley averaged better than 55 bushels per acre.

Art informs us the geese evidently like their oatmeal porridge as the best birds came from a morning shoot out of pits in an oat field. Speaking of porridge—the boys say digging and filling-in pits really works up an appetite, and in appreciation for receiving permission to hunt from the majority of farmers asked, they were anxious to leave the fields in good shape.

Indians Scan Skies,
Predict Long Winter

Rocky Mountain House—Mark November 11 on the calendar as the day to get out the long, red flannels.

That's the day the Indians of the Kootenay plains predict will see the end of fair summer weather and the start of a long, cold winter that will see snow in every month until May.

The Indians, in town during the week-end to collect and cash old-age pension, and family allowance cheques, told interviewers:

"So many hot days all summer, we must have cold now." The Indians say they make their forecast on the basis of the birds' flying south, early frost, wild animals coming out of the mountains to settled areas earlier than usual and the early turning of rabbits from brown to white.

For Doubting Thomas, the same Indians last fall predicted the west would have a long and hard winter and for one uninterrupted, 78-day stretch, the temperature in Edmonton didn't go above freezing.

AUCTION SALES—don't forget the weekly Auction Sales every Saturday, where you get the highest prices for your hogs and cattle. Also big feeder and culler sale Wed., Oct. 17, 1966 at 1 p.m. 2/4 commission will be charged for 10 head or more at ROSEHILL'S AUCTION MART, Box 427, Camrose, phone 2114 or 2967.

(These are not necessarily the views of the editor of this paper.)

2006 and all that!

(From The Drumheller Mail, Drumheller, Alberta—August 15, 1956)

Had any Englishman of 1906 forecast that well within 50 years Britain would be so desperately short of coal she would be importing it in large quantities and at great cost, he would have been laughed at. Had any American as recently as 1920 predicted that in 30 years the U.S. would need to import not only iron ore, but lead, zinc and petroleum as well, he would have been similarly ridiculed. Yet such are the facts today. They should cause Canadians "furiously to think."

Canada is a land rich in natural resources, something which most of us take for granted. Few of us are conscious of our exceptional good fortune in living in an age in which our known minerals, metals, oils and gas are more valuable than ever before. They are vital to modern industrial production and the appetite of the industrial giants of the world for them is insatiable.

It is this which, in the past, has tempted some Canadians to take the short view and advocate that this nation should be content to fill the role of supplier of raw materials to the countries which want them. Forget about developing our own industry, in fact.

We could undoubtedly do this for quite some time. But, of course, only for so long, as sooner or later we shall have exhausted our natural resources. And, since there could be no faster way of doing just that, it would assuredly be sooner rather than later. What then?

Some people will answer that these things take care of themselves. It will not happen in our time, so we should not worry. Such an argument ignores our moral responsibility to nurture our country for those who come after us.

Although Canada's future as a leading industrial power is now decided beyond any doubt, our exports of primary products is soaring.

Even so, our total exports are insufficient to pay for our imports which are currently at a new high. Yet fully 75 percent of these are finished manufactured goods. Many are already manufactured here in Canada. Some are not yet manufactured, largely because the size of the domestic market makes economic production impossible.

What of the future? There are ten million more Canadians today than there were 50 years ago. How many we shall number in 2006 is anyone's guess. But that our population will increase at a much faster rate in the second half of this century than it did in the first is certain. The process should be accelerated by all desirable means. Shortage of people is still this nation's gravest handicap.

Meanwhile, we should be warned by what has happened in Britain, the U.S. and elsewhere. Improvident and selfish exploitation of our natural resources now, without regard to the future, can only spell disaster for our children and our children's children.

We are making use of—and profiting from—our natural wealth on a greater scale than ever before. But Canada will be here long after we are gone. Which is why our moral right to continue to do so is conditional upon the simultaneous development of our manufacturing potential with energy and vision.

We have come far in recent years. We have much further to go.

The fields of home

(From The Hanna Herald & East Central Alta. News—Aug. 16, 1956)

Sometimes a lella gets "down" on himself, his town, his city, "everythin' in general." A good recipe for dispelling this feeling is to pack up the car, take ma and the kids and head for "greener pastures" on a temporary basis at least.

During the summer, thousands of Canadians are travelling the highways, airlines and railways, literally scurrying all over Canada and the U.S. with the same thought in mind, "getting away from it all." While they are away, the people they meet, the places they see and the things they do, a real tonic, and before long life begins to look a little rosier. But the "payoff" comes when the holiday nears its end, and the homeward trek starts. Usually it is with a feeling of elation, as the miles go by and the happy but weary travellers near the "home roost."

It's nice to get back and meet the old gang, talk over local events that have transpired while you were away. Everyone should take some kind of a holiday. It need not be expensive, or too elaborate. The principal in a holiday as we see it is to get away, and see how the "other half of the world" is living. Then, "the fields of home" are much more appreciated, and we are content to settle down and "hit the ball" in anticipation of another holiday next year!

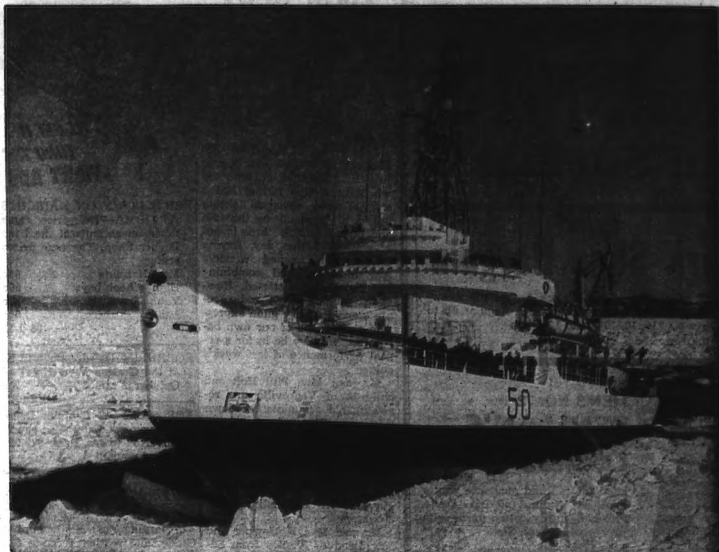

Poor timing

(From The Camrose Canadian, Camrose, Alberta—July 11, 1956)

Since we are not informed in the baking industry we do not profess to be able to pass on to you a schooled opinion in cost accounts, but would justify the recent increase in bread prices. We do know enough about human psychology to assert that the increases exemplified very poor timing on the part of the bakery concerns. Camrose has two local bakeries with six or eight city bread concerns competing in the local market. Such duplication of services is bound to be reflected in cost. We do not for one moment advocate the elimination of competition, but we can't see where the industry can justify the duplication that has become apparent in Alberta.

We mentioned coffee last week. Actually there is a world surplus of coffee, so there must be a commercial nigger in the fence somewhere who is taking an abnormal toll from the coffee trade.

Also, we feel that it is poor timing on the part of the grain handling concerns to apply for increased grain handling charges. Let the farmer get a chance to catch his breath from the recent economic squeeze before the screws are applied on him again.

"SIX-ENGINE ICE"—The bow of HMCS Labrador rides high as the RCN's Arctic patrol ship forces her way through stubborn, eight-foot-thick ice by literally mounting a big floe and letting her 6,500 tons, backed by more than 10,000 horsepower, break away a pathway. In this particular operation, the ship had to smash its way through an icefield some 30 miles long and with ice between three and eight feet thick. The Labrador is now in the Eastern Arctic, engaged in DEW line assignments and oceanographic surveys. (Nat. Defence Photo)

Cheaper by the dozen

While there may be strength in numbers, Stephanus Boudewyn is more interested in the train travel bargains that can be offered him and his large family.

Recently, he, his wife and ten of his 12 children boarded the train at Winnipeg to travel nearly 1700 miles to Victoria under the family fare plane at an average cost per person of \$18.05, or just over a cent a mile.

As the father, Mr. Boudewyn paid full fare. His wife, under the plan, paid half fare as did each of his five children over 12 years of age. Another four children under 12 travelled for one-quarter fare while the tenth child, aged four, travelled free.

Fight against cancer

(From The Virdee Empire, Virdee, Manitoba—July 11, 1956)

Cancer kills an average of 55 Canadians daily... almost seven times the rate of death in the country's auto accidents.

A group of Canadian scientists met at Honey Harbor, Ont., on Georgian Bay, to pool the knowledge they had gleaned in the war on cancer. The results of their meeting may speed up the unravelling of cancer's mystery... why it begins and how it may be destroyed.

Scores of researchers are working in this country to add to the knowledge man has about the disease. They work sometimes thousands of miles apart in diverse fields. Some specialize in the chemistry of the body cells, some study the effect of radiation on cancer, others are looking for the possible role of viruses in cancer.

The Honey Harbor meeting brought these researchers together and enabled some of them to gain access to research material which they would have needed a year to obtain had they depended on medical literature.

The importance of their talks and panel discussions stems from the fact that some glimmer of light shed on the problem by one scientist may stimulate research by others along new lines.

It was the second such conference to be held under sponsorship of the National Cancer Institute of Canada. Chief function of the N.C.I. is to sponsor cancer research in this country. This year, it is spending more than \$500,000 in the war on cancer through research grants and fellowships.

So successful was the first cancer conference held at Honey Harbor in 1954, that the 415-page record of the discussions has become standard work on cancer research throughout the world.

While the total amount spent in all Canada on cancer research is less than the expenditure of one of the big research institutes in the United States, the work of Canadians looms large in the world-wide research picture.

After two scientists from the University of Western Ontario, Dr. Murray L. Barr and Dr. Keith L. Moore, told the conference of their study of body cells, a prominent British scientist paid a tribute to them. Dr. A. Huxford, a leading specialist from the Royal Cancer Hospital in London, said their paper alone made his trip from Britain worthwhile.

On board HMCS Labrador

Slugging their way through a huge ice field while surveying the approaches of a Baffin Island harbor, officers and men of this Arctic patrol vessel have had frequent occasion to use two expressions peculiar to the ship.

The terms are "four-engine ice" and "six-engine ice" and they describe just how much power is needed to enable the Labrador to smash her way through ice fields of varying thickness.

Thus "four-engine ice" is from three to six feet thick and covers less than 70 percent of the water surface. "Six-engine ice" is from five to 10 feet thick and covers

between 60 and 100 percent of the surface. The latter demands the full use of the half-dozen 1,750 horsepower diesel engines which power the Labrador.

The ship's weight, the hull design and the power of the engines are the factors which determine the success of icebreaking. The Labrador's bow construction enables her to ride up on the ice and bring more and more weight to bear until, usually, the floe gives way. The thicker the ice the more power is required to drive the ship's bows onto the ice.

In some cases the Labrador's 6,500 tons and more than 10,000 horsepower will not do the job at first try, and then the operation becomes a slugging match with the ship making repeated charges at the same floe.

Hydrographic surveys, such as the one undertaken off the Baffin Island harbor, entail repeated runs by the ship from the off-shore waters to the harbor entrance where the work is taken over by the ship's boats. During these runs an exact plot of the ship's position is kept and echo sounders produce a running graph of the water depth. It is then relatively simple to plot a line of soundings on a chart by relating the depth recorded at a certain instant to the ship's position at the same time.

The ice field encountered during this particular survey extended for 30 miles and the Labrador had to steam through broken masses of ice varying in thickness from three to eight feet, with individual floes sometimes measuring half a mile across.

Several icebergs in the area had to be avoided, but their presence was appreciated to the extent that they relieved the bleakness and monotony of the scenery.

GREATEST POWER

It is just because religion is the greatest power in the world, touching men's souls at a depth which nothing else can reach, it can, if perverted, do greater harm than anything else.

Strictly Fresh

One sure way to borrow trouble is to have loans outstanding with several finance companies at one time.

Fellow across the desk from us says that if they pile on many

more taxes this country will be known as the "land of the fee."

Would a fellow who lost all his money prospecting for uranium be known as an atomic bum?

A bore is the fellow who tells the story you were just going to tell.

Girl with a pretty figure is sure of collecting a large amount of interest.

Flash bite at a bait both by sense of sight and sense of smell.

Just watch these yummy BANANA CAKELETS disappear!

Note: Have all ingredients at room temperature.

Measure into bowl:

- 8 eggs, shortening
- Sift together twice, then over shortening:
- 2 c. once-sifted pastry flour
- or 1 1/4 c. once-sifted all-purpose flour
- 2 tsp. Magic Baking Powder
- 1/2 tsp. baking soda
- 1/2 tsp. salt
- 1 1/4 c. granulated sugar

Stir in until blended:

- 1 c. mashed ripe banana
- 1/2 c. milk

then beat 300 strokes or 2 min. by hand or with electric mixer at medium speed.

Add:

- 1 tsp. vanilla
- 2 unbeaten eggs
- and beat 150 strokes or 1 min.

Two-thirds fill muffin pans, either greased or lined with cup cake papers. Bake in moderately hot oven, 375°, 20 to 25 min.

Spinkle hot cup cakes with a mixture of:

- 2 tbsps. icing sugar
- or 1/2 tsp. ground cinnamon

Yield: about 20 cup cakes.

You get lighter, more delicious baked goods with dependable MAGIC Baking Powder. MAGIC protects your other fine ingredients... and it saves you money! Buy MAGIC today.

Fall Work Needs at Savings

MEN'S Work Shoe Bargain

High quality Greb Shoes. Whole stock. Sewed and screwed sole. Solid leather. Barly broken sizes. Regular up to \$10.95. Sizes 6 - 7 1/2, 10, 10 1/2 and 12. Plain toe and toe cap. SALE, pair **7.98**

Local News

The many friends of Mrs. N. V. Ashdown will be sorry to know that she met with a painful and serious accident when she was knocked down by a truck in the city. She suffered a fractured skull and was some time in hospital. She is now convalescing at home.

Last Friday it rained heavily here for about 12 hours. It was just a steady downpour the whole time. One farmer had a straight-sided saugepan sitting out in his yard during the rain and reports exactly three inches of water fell that day. Drying winds have worked wonders and threshing and combining have again been started. However, judging from radio reports and the very glum expression on the face of our own barometer, we may be in for a repeat performance of last week's deluge.

Mr. and Mrs. Phil Holt and children of Vegreville are renewing old acquaintances down this way. We understand that Phil is assisting brother Barry with the harvest.

Mrs. F. Watkinson returned home on Sunday last after a three weeks visit with Mr. and Mrs. E. W. Carter in Wainwright.

Mr. and Mrs. R. Cowper and new daughter Shelley from Edmonton motored to Irma last week-end and returned home on Monday. Melodie, who had been staying here with her grandparents Mr. and Mrs. C. Pyle, returned to the city with her father and mother.

Mr. and Mrs. F. Drewicki are home again and report a grand trip by car to Alaska and back. They were very taken with the lovely scenery in Northern B.C. and agreeably surprised to find the roads so good up that way. On their way home they called at Athabasca to see Mr. John Nichol and Irma folk will be glad to know that he is feeling fairly well and is enjoying life at Athabasca. He does like to get Irma news and would appreciate letters and cards from his old time friends here.

Born to Mr. and Mrs. R. Cowper of Edmonton, the former Shirley Pyle, at the Misericordia hospital on Sept. 13, a daughter Shelley Joyce, a sister for Melodie.

Born to Mr. and Mrs. Donald Simmerman at the Misericordia hospital, on Wednesday, Sept. 19, a daughter.

The Evening W.A. is having a bake sale at the Irma Food Market on Saturday, October 6 from 3 to 5 p.m.

Mr. and Mrs. A. Klontz of Jasper are in Irma this week to visit with the latter's mother, Mrs. J. Ostad and sister Sharon. Their small son who has been visiting here for the past three weeks, will return to Jasper with them.

Mrs. T. Dykes of Edmonton visited here recently at the home of her brother Mr. C. Coffin. She then went on to Delta to visit the Sherman Coffin family. Her father, Mr. C. Coffin, accompanied her to Delta.

The October meeting of the W.I. will be held at the home of Mrs. Car Coulman, Hostesses. Mrs. Kirkman and Mrs. Scott. Raffle, Mrs. Stewart. Topic — Handicraft. Mrs. McFarland. Program — Mrs. W. Rae. Roll Call—Tell about a Halloween Prank you have done.

An old timer of this district, Mr. L. Smith, who farmed in the early days on the land now known as the Jamieson Ranch, was at Irma this week with his wife. Mr. and Mrs. Smith now live near Hamilton, Ont., and have come back this way after about 40 years absence.

Dr. and Mrs. Lowther of Edmonton were also here to visit with them. Mrs. Lowther, better known here as Mrs. Norman King, is Mr. Smith's sister. While here Mr. and Mrs. Smith and Dr. and Mrs. Lowther called on many old friends including Mrs. J. C. McLean, Mrs. F. Watkinson and Mrs. R. O. Larson.

Of nearly 35,300 Canadians charged with indictable offences in 1954, 30,900 were convicted, 4,216 were acquitted and 52 were detained for insanity.

One-third of the working population of Ottawa is employed by the federal government.

FOR SALE—12 ft. John Deere Cultivator; Guernsey range converted to gas. Price \$25.00. —C. Anquist.

AVERAGE WEATHER FOR OCTOBER

According to the Country Guide, the weather forecast for October is as follows:

October is expected to be about as seasonable as possible, both temperature and precipitation ranging within small limits of normal. The first week or two of the month will be relatively mild, with a number of days in the 60's or low 70's. Appreciably colder weather will develop about the 15th, dropping minima into the low 20's. A few spots a little below 20. Gradual warming will ensue, until another cold air mass spreads over the province about the 29th or 30th, bringing nightly readings of from 10 to 20 degrees. Precipitation should occur principally as showers, and as such, amounts will be typically erratic. The most important amounts accompanying the cold snap at mid-month and at month's end. Additional shower activity, in most instances of lesser consequence, is in prospect between the 4th and 8th. Less than the usual amount of snowfall is anticipated; hence, fall plowing and completion of harvest operations should advance nicely.

Bushel Weight Becoming Obsolete

The wide-spread campaign in the United States to switch the grain trading unit from the bushel to the hundredweight is gaining momentum. The slogan "the hundredweight by fifty-eight" has been adopted and supporters of the change hope to have the obsolete bushel shelved by that time. A committee under the chairmanship of the president of the National Feed and Grain Dealers Association is working out the necessary details to effect the changeover. Early next year the U.S. Department of Agriculture will release a summary of the advantages to be gained by using the fixed hundredweight as compared with the variable bushel. So far little has been done in Canada to adopt this much needed reform that would so greatly simplify the calculations involved in handling grain. If the Canada will be the only country U.S. changes to the new system, in the world still using a bushel which fluctuates according to the weight of the grain. — Wheat Pool Budget.
